

arunalight

Red Light Therapy for Retinal Health

Arunalight is designed to help support retinal health and potentially slow progression, especially in **dry AMD**.

Non-invasive
Painless

UV-free

Home
treatment

HOW ARUNALIGHT WORKS

Uses **670 nm red light** therapy (photobiomodulation)

Red light passes through the eye to reach the **retina**

Light is absorbed by retinal cell **mitochondria**

Helps cells produce more cellular energy (**ATP**)

Reduces **inflammation and oxidative stress**

Supports retinal cell **health and function**

May improve **blood flow** and **oxygen** delivery to the retina

Designed to help support and protect retinal tissue in conditions like **dry macular degeneration**

BENEFITS FOR MACULAR DEGENERATION (AMD)

POTENTIAL BENEFITS FOR **DRY AMD**

May help **slow progression** of dry age-related macular degeneration

Can support **healthier retinal cell function**

May reduce **drusen** buildup progression

Helps improve the retinal environment by **reducing inflammation and oxidative stress**

Non-invasive, painless, and **drug-free** treatment option

EASY TO USE

1 Wear the glasses with the eyes closed

2 Turn on the device

3 Relax for 3 minutes

4 Use every other day
